3D Modeller	Fullscreen	Portugal	Jun 2000 - Apr 2004

OVERVIEW

* Hardcore programming languages enthusiast. Love everything from C to Arnold C (https://github.com/lhartikk/ArnoldC) including Python, Java, C++, Go, Javascript, PHP, R, Rust or D

* Currently working on some desktop projects in Core J2SE and on an Android App. Feel free to browse my github (https://github.com/roycocup).

* Responsible for bringing innovation to many of the workplaces where I have worked, such as Git to LibertyTech, Bash Shell script automations for SVN at PremierIT, restful API at CabinetUK.

* Worked in commercial PHP-Mysql for over 10 years using a mixed set of frameworks and development methodologies.

* Experience working with high street renown clients such as Vodafone (Markettiers4dc), Royal Caribbean (CabinetUK), Royal Medical Colleges, Engineering and Directors houses in UK (PremierIT), Ford Motor Company and Samsung (Liberty Tech).

* Keen user of backlogs and todo lists

* Really thinks that Agile is the new Waterfall (I can explain why :)).

* Morning thinker, afternoon doer.

NOTES

* The easiest way to catch me is via my email (rodrigo.pitta@gmail.com)

* I do have a website (http://rodderscode.co.uk)

* This CV was purposely made in ASCII so that it fits into every single upload form on the internet (and mess up recruiters standard software) and also because it looks "retro" and cool.
